Subject: AR 323

My name is Israel Torres and I am a Correctional Officer at Ely State Prison and I would like to inform you of AR 323 how it is affecting the staff here at the prison. The staff are coming to work with coughs, colds, fevers, diarrhea, vomiting, etc. are affraid and intimidated to call in sick, because they do not want to get any points from the AR 323 that will cause them to get written up and/or terminated. They state that they do not want to lose their job because they have a family to support, pay the bills, put food on the table. Yet they will come to work to get other staff ill. I strongly believe that AR 323 is violating Federal guide lines and besides the time one builds working is time for when one or their family member is sick. I do not support AR323. Thank you for your time in this matter.

Sincerely,
Israel Torres
